LinkedIn

I enjoy exploring data, identifying patterns, and presenting findings in a clear and meaningful way. I am continuously developing my analytical and technical skills while seeking opportunities to contribute to data-driven projects and grow as a Data Analyst.

Education

Bachelor's Degree in Information Systems

GPA: 3.86/4.00

2022 - 2026

Thesis: Analysis of Budget Performance of Work Units Using the K-Medoids Algorithm at the Directorate General of Treasury in Riau Province

Field: Business Intelligence

Relevant Coursework: Statistics and Probability, Database Systems, Advanced Database Systems, Data Mining, Big Data, Intelligent Systems, Algorithms and Data Structures.

Experience

GENERAL AFFAIRS INTERN

Direktorat Jenderal Perbendaharaan Provinsi Riau ✦

March - April 2025

- Supported **administrative** and **operational** activities across four sub-sections: HR, Finance, General Administration, and Performance Evaluation.
- **Designed** and **developed** a **digital public service** platform integrating Linktree, Google Forms, and Looker Studio.
- Developed a **Looker Studio dashboard** for data monitoring and information management, which continues to support institutional operations.

Experience

HEAD OF JOURNALISM BUREAU

Himpunan Mahasiswa Ilmu Komputer (HIMALKOM) UNRI

May - Dec 2023

- Created concise and engaging captions and press releases to support organizational publications.
- Collaborated with teams to develop effective and cohesive media publication strategies.
- Maintained editorial standards and consistent writing style to improve content quality.

Volunteering Experience

Oct - Nov 2025

HID Staf - Computer Science Festival

- Designed official letterheads and correspondence templates to support consistent organizational branding and administration.
- Developed standardized document templates for organizational communication and documentation.

Mar - Jun 2023

Sekolah Multimedia I - Secretariat Staff

- Prepared official letters and administrative documents to support events.
- Managed attendance registration during event implementation.

Certifications & Courses

Actively pursuing certifications and training across various fields to continuously develop and enhance professional competencies, including:

- BNSP – Level IV Industrial Entrepreneurship
- BNSP – Public Relations Staff
- BNSP – Digital Marketing
- Digitalent – Oracle Cloud Infrastructure Foundation I & II
- Digitalent – Java Fundamental & Programming
- Oracle Academy – Database Foundations
- RevoU – Introduction to Data Analytics
- Dibimbing – Data Science
- MySkill – Data Analysis Fundamental
- MySkill – Index Match, Vlookup and Hlookup in Ms. Excel
- MySkill – Data Formatting & Cleansing

Certifications & Courses

Project

Data Analytics ✦

Data Science ✦

Business Intelligence ✦

Web Development ✦

Fratha Sankaku – Triangle Calculator

Full-Stack Developer | Apr – May 2025

- Developed an Android-based calculator application for calculating triangle area and perimeter.
- Developed the interface and functionality for right-angled and scalene triangles using Python.
- Integrated the application's front-end, back-end, and calculation logic to support the core features.

Project

E-Laundry Web Application Development

Full-Stack Developer | Aug – Dec 2025

- Designed UML diagrams to define system requirements and workflows.
- Developed the homepage and key front-end & back-end features using Laravel.
- Developed transaction management and payment features, including payment gateway integration.
- Integrated front-end, back-end, and database components to ensure proper data flow.

Thesis Classifier and Finder Using Naive Bayes and Cosine Similarity

May 2025

- Developed a text mining system to classify thesis abstracts using the Naive Bayes algorithm.
- Implemented Cosine Similarity to retrieve theses based on content similarity.
- Coded the classification and similarity retrieval modules and ensured the algorithms functioned correctly.

Project

Media Layanan Umum — Integrated Service Dashboard

Mar 2025 – Apr 2025

- Developed a digital general administrative service platform to improve access to information and streamline service requests.
- Integrated Linktree, Google Forms, and Looker Studio into a centralized workflow for service access, data collection, and monitoring.
- Built an interactive Looker Studio dashboard to visualize collected data and support administrative monitoring and reporting.

Project

Data Entry App using SQLite

May 2025 – Jun 2025

- Developed a simple application for entering, storing, and managing data using SQLite as the database.
- Designed the user interface and input forms to support efficient and organized data entry.
- Created interactive pages to provide a smooth and user-friendly data management experience.

The app includes several screens for user management:

- DATA USER:** A list view of existing users.
- FORM DATA USER:** A form to add or edit user information, including fields for ID, Name, and Age.
- Form Actions:** Buttons for TAMBAH DATA (Add), TAMPIL DATA (View), UPDATE DATA, DELETE DATA, and EXIT.
- Data Confirmation:** A message "Data berhasil ditambahkan." (Data successfully added).

Sales & Profitability Performance Dashboard

Sep 2026

- Designed an interactive Excel Business Intelligence dashboard to analyze sales performance, profitability, and profit status across multiple business dimensions using 10,000+ transaction records.
- Developed KPI metrics, profitability analysis, product performance, and sales trends using PivotTables, charts, and calculated fields.
- Integrated interactive Slicers to enable dynamic filtering and support data-driven business insights.

HR Dataset Analysis with Apache Spark

Sep 2025

- Analyzed an HR dataset containing 2+ million records using Apache Spark and Python.
- Applied RDD-based distributed data processing for data cleaning, transformation, and exploration.
- Extracted insights into employee and organizational patterns, demonstrating the application of Big Data techniques to large-scale datasets.

Thank *you.*
